

Mykal Gerald is a third year medical student at the Lewis Katz School of Medicine at Temple University. She is also a candidate for a masters degree in urban bioethics. Ms. Gerald is a graduate of Villanova University with a bachelor's degree in biochemistry with a minor in Spanish Language and Cultural Studies. She has been described as a visionary and strategic thinker and was elected to the executive board of the student government Association as community service Board chair and representative. Most recently, she designed a program to enhance the more traditional MLK day of service by providing her medical school colleagues an opportunity for thoughtful reflection and dialogue with an intentional focus on Dr. King's life and legacy of both active visit and service she is actively involved in LK SOM's COVID-19 curriculum task force as well as a participant in Temple University strategic planning committee. Student Dr. Gerald currently conducts research on disparities in plastic surgery and facial trauma. Previous research pursuits include studies on the bioflavenoid quercetin, which many now believe has helpful properties in the fight against COVID-19. Her interests include travel soccer yoga and dancing.
